

## Project Experience

[github.com/OxDanki](https://github.com/OxDanki)

*Some of my works you can find:*

- a Decentralized Exchange made from ground up
- An Arbitrage Bot using Flashloans
- A Defi index for L2 tokens
- A simple NFT minting bot
- A supply chain dApp for farmers and direct buyers of their produce
- A test script for reentrancy and integer overflow attacks

## Dev Skills

- Smart Contracts
- NFTs
- Defi / Arbitrage
- Web3 Security
- Business Dev

## Tech Stack

- Solidity
- JS (Node, React)
- Hardhat, Ethers
- Go, Rust, Vyper

## Education

- *Metaschools.so*  
1st student to complete all the Courses & Projects  
Mostly NFT Projects
- *Dapp University*  
Defi, Arbitrage bots, Oracles, Web3 Security, EVM and Foundational Knowledge
- *Damn Vulnerable Defi*  
Blockchain Security  
Solved for the exploit in all the challenges of the game

**Tin**  
**Erispe**

The day I discovered Web 3.0, I went down the rabbit hole and never looked back. I'm Tin, and I've worn many hats as a designer, a digital marketer, and now a blockchain developer. I aim to combine theory, structure, and intuition in my practice of making secure and functional smart contracts.
