

Project Experience

github.com/0xDanki

Some of my works you can find:

- a Decentralized Exchange made from ground up
- An Arbitrage Bot using Flashloans
- A DAO-governed Escrow Vault
- A simple NFT minting bot
- A supply chain dApp for farmers and direct buyers of their produce
- A test script for reentrancy and oracle manipulation attacks

Dev Skills

- Smart Contracts
- NFTs
- Defi / Arbitrage
- Web3 Security
- Business Dev

Tech Stack

- Solidity
- JS (Node, React)
- Hardhat, Ethers
- Go, Slither, Vyper

Education

- *Metaschools.so*
1st student to complete all the Courses & Projects
Mostly NFT Projects
- *Dapp University*
Defi, Arbitrage bots, Oracles, Web3 Security, EVM and Foundational Knowledge
- *Damn Vulnerable Defi*
Blockchain Security
Solved for the exploit in all the challenges of the game

Tin
Erispe

The day I discovered Web 3.0, I went down the rabbit hole and never looked back. I'm Tin, and I've worn many hats as a designer, a digital marketer, and now a blockchain developer. I aim to combine theory, structure, and intuition in my practice of making secure and functional smart contracts.
